

7/25/16

Allie Hexley

Today's Progress...

- Got communications working to control one MFC
- Went to radio shack to pick up extra male ports for serial adapter
- Lots of issues arose whilst trying to get MATLAB to communicate with MFCs including driver errors (resolved) and control not changing flow on controller even though it claims to on MATLAB (unresolved)

To work on tomorrow...

- Fixing errors for controlling MFCs
- Communications for all MFCs
- Valve circuit when mosfets arrive
