

7/19/16

Allie Hexley

Today's Progress...

- Finished construction of housing for circuit board
- Mosfets blew so no valves work (but valves worked at initial test so board appears to work fine, waiting on new mosfets to test)
- Worked on Ctrax video software. Need to define region of interest in MATLAB acquisition then use Ctrax tracking wizard.

To work on tomorrow...

- Ctrax -> JAABA/MATLAB file for processing?
- Valve set-up/testing when new mosfets arrive
