7/26/16

Allie Hexley

Today's Progress...

- Installed DAQ into computer
- Set up remaining MFCs and created 2 input cables
- Got control of one MFC using Kana's serial adapter on my computer
- Completed valve control circuit and installed into box, valves all work fine now

To work on tomorrow...

- Reboot computer to install driver software for my serial adapter
- Get MFCs working with my serial adapter
- Get control of all MFCs simultaneously
- Install software for DAQ and set-up valves into odor line
- Get code to control valves from Zhanetta and test
